Assessment Brief

Module Title:	Web & Mobile Technologies
Module Code:	B9IS122
Module Leader:	Fiona Redmond
Stage (if relevant):	6
Assessment Title:	Development of a Mobile Web Application
Assessment Number (if relevant):	1 of 2
Assessment Type:	Practical
Restrictions on Time/Length : +/- 10%	N/A
Individual/Group:	Group (2 – 3)
Assessment Weighting:	50%
Issue Date:	25 th Oct 2017
Hand In Date:	22 nd Nov 2017 @ 11am
Planned Feedback Date:	Hand in Date + 4 weeks
Mode of Submission:	Electronic via Moodle and FTP to Web Server

Assessment Task

The following is the assignment as set out for the module of Web and Mobile Technologies.

The assignment is a group assignment (2 or 3 students per group).

Assessment Task (100 Marks) - Weighting (50%)

The following table illustrates the allocation of marks for each individual part of the assignment.

Mobile	Breakdown of Marks
Group Presentation 25 marks	on 25 marks

The following important points should not be ignored while working on your assignment; you will lose marks if you ignore any/all of the following:

- Usability of the application
 - Functionality
- Application design and code style / Naming conventions 1. 3. 3. 5. 5. 5.
 - Comment the code
- Indentation

Assessment Brief

friendly and should provide actual functionality which users can take advantage of (i.e. your mobile Design and implement a web application for use on mobile devices. The application should be touchweb app should have a specific purpose such as a blog app, an app for a restaurant or a quiz app,) Your application should be built using several web technologies such as HTML5, CSS3 and JavaScript and a framework such as jQuery Mobile. You may choose an alternative mobile framework or library such as Bootstrap, ionic or Sencha Touch just to name a few.

Your web application must by designed and implemented using a Mobile First approach. It should contain the following:

Requirements:

- Contain at least three html pages (or regions of a SPA single page application)
- A Form
- At least two images
- A navigation bar
- At least one breakpoint / media query to respond appropriately when viewed on smartphone and tablet screen sizes.
- Use at least two HTML5 API's
- Web storage
- Geolocation
- Device orientation
- High-quality code
- The application code must be separated into consistent and cohesive modules
- The modules must follow the best practices for developing applications
- Meet current HTML5 web standards
- Meet current CSS standards
- Validation and Error Handling
- Validation of user input
- o Providing user with user-friendly notifications of errors

Notes:

You should test it on selected mobile devices using either online emulators, or actual devices. (You Each page should link back to the index.html. The layout should be consistent throughout the app. will need to identify the devices you tested it on in your Group presentation / slides) It is not enough just to put the above components on your html pages and get them working; there must be a logical reason for it. The app must have a purpose e.g. a blog application, a diary application, a game

Submission:

Moodle via the submission link provided. Each team member is required to submit (the same) copy When you have completed the project, zip the project files into a compressed folder and upload to of the group project and presentation slide(s).
